Response to Applicant Arguments

Applicant's arguments filed 11-16-05 have been fully considered but they are not persuasive.

In response to applicants arguments the examiner first notes that applicant fails to point out any specific features of which the prior art fails to show. As a combination to make the 35 U.S.C. 103 rejection. Davis discloses the egg shaped configuration claimed by the applicant, in the environment of a hand exerciser and Sorbothane discloses the teaching of using a visco-elastic material as the material of which hand exercisers are known to be manufacture of (see Sorbothane page 6, Col. 2, lines 9 and 10. Sorbothane discloses this material may be used in hand exercising devices. This statement leads the examiner to believe that it would have been obvious to one of ordinary skill in the art to manufacture the device of Davis of a material such as Sorbothane which is visco-elastic.

In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988)and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, in the instant application the motivation to combine the references is strongly suggested by the prior art of Sorbothane page 6, col. 2.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

> (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Davis in view of Sorbothane.

Claim 1 is rejected for the same reasons as set forth in the rejection of the same claims in the office action of 8/22/05.

Davis discloses an egg shaped hand exerciser and Sorbothane teaches manufacturing hand exercisers of Visco-elastic material. Given the above teachings the examiner notes that it would have been obvious to manufacture the device of Davis of Sorbothane.

Applicant's arguments fail to comply with 37 CFR 1.111(b) because they amount to a general allegation that the claims define a patentable invention without specifically pointing out how the language of the claims patentably distinguishes them from the references.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
